

Conflict Minerals Sourcing Policy

Rocker Industries (RI) is committed to the goal of using tin, tantalum, tungsten, and gold in its products that are conflict-free, meaning not sourced from entities that directly or indirectly finance armed conflict in the Democratic Republic of the Congo or adjoining countries.

This policy applies to relevant suppliers, which are suppliers of materials or components that contain, or may contain, tin, tantalum, tungsten, or gold.

In support of this commitment, and of its customers' conflict minerals programs, RI exercises reasonable due diligence with relevant suppliers, following the framework of the OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, and expects those suppliers to do the same.

RI expects its relevant suppliers to:

- Perform reasonable due diligence on their supply chains to determine whether products sold to RI contain tin, tantalum, tungsten, or gold and, if so, whether those metals are sourced from conflict-free smelters, such as those conformant with the Responsible Minerals Initiative's Responsible Minerals Assurance Process (RMAP);
- Provide the results of that due diligence to RI upon request, using the Conflict Minerals Reporting Template (CMRT); and
- Work toward sourcing any such metals only from conflict-free smelters.

If a supplier's due diligence identifies sourcing that is not conflict-free, or a supplier does not respond to RI's requests, RI will work with the supplier toward corrective action and may consider alternate sources if the supplier does not make reasonable progress.
